Gorjan Radevski

Education

- 2024 **Ph.D. in Machine Learning**, *KU Leuven*, Belgium, [[Ph.D. Thesis](#)]
 - Research at [VISICS](#) (ESAT-PSI); Supervisors: [Prof. Tuytelaars](#) & [Prof. Moens](#)
 - Tech lead (with FlandersMake): Autonomous forklift with spoken language control [[Video](#)]
- 2019 **Master of Artificial Intelligence, Cum Laude**, *KU Leuven*, Belgium
- 2017 **Bachelor in Computer Science and Engineering**, *FINKI*, Macedonia

Working Experience

- Nov. 2023– **Machine Learning Research Consultant**, [NEC Labs Human-Centric AI group](#), Remote
 - Present
 - Large Language Models (LLMs): Reasoning; Agents; RAG; Alignment; Steering
 - Led (ML & engineering) the LLM Explainer project (NEC Best Value Award 2025) [[Link](#)]
- Jun. 2024– **Postdoctoral Researcher**, [VISICS Lab](#), KU Leuven, Belgium
- Oct. 2025
 - Multimodal and Omnimodal Large Language Models
- Oct. 2022– **Machine Learning Research Intern**, [NEC Labs](#), Heidelberg, Germany
- Feb. 2023
 - Models for linking open information extractions (OIE) to knowledge graphs
 - Publication at **EMNLP 2023** [[Link](#)]; Patent application [[Link](#)]
- Nov. 2018– **Machine Learning Research Intern**, [IBM Research](#), Zurich, Switzerland
- Mar. 2019
 - Models predicting chronic kidney disease 12 months ahead (AUROC: 0.93-0.99)
 - Publication at **Journal of Infectious Diseases** (h-index 282) [[Link](#)]
- Jun. 2018– **Machine Learning Engineering Intern**, [Luminovo](#), Munich, Germany
- Oct. 2018
 - Video classification pipelines for automating media workflows at ProSiebenSat.1

Research Experience: Selected First-Author Publications

- 2025 **DAVE: Diagnostic benchmark for Audio Visual Evaluation**, [[Paper](#)] [[Code](#)] [[Dataset](#)]
 - NeurIPS**; Datasets and Benchmarks; 24.9% acceptance rate
 - Benchmark dataset addressing visual bias in audio-visual LLMs
- 2025 **On Synthesizing Data for Context Attribution in Question Answering**, [[Paper](#)]
 - ACL**; 20.3% acceptance rate
 - Synthetic data method enabling fine-tuning LMs for attributing generations to context
- 2024 **LaSCal: Label-Shift Calibration without target labels**, [[Paper](#)] [[Code](#)] [[Poster](#)]
 - NeurIPS**; 25.8% acceptance rate
 - Calibration error estimator under label shift, enabling unsupervised model calibration
- 2023 **Multimodal Distillation for Egocentric Action Recognition**, [[Paper](#)] [[Code](#)] [[Video](#)]
 - ICCV**; 26.2% acceptance rate; Spotlight at **Ego4D workshop** within **ECCV**
 - Multimodal distillation achieving RGB-only inference with multimodal teacher performance
- 2021 **Spatio-Temporal Layouts for Compositional Action Recognition**, [[Paper](#)] [[Code](#)] [[Video](#)]
 - Oral at **BMVC**; ~3.5% of all papers
 - Multimodal fusion of object layouts and RGB frames improving video action understanding
